

**Press Release – For Immediate release – 29 March, 2006**

## **Biodiesel Bus Drives Kids Wild**

Forty lucky Townsville school kids from Townsville State High School will get an hour out of class tomorrow on a special tour to the Strand in a **biodiesel powered bus**.

The tour will take them to the Strand Wind Turbine to learn about renewable energy and biofuels and take the **reeFUEL biodiesel quiz**.

The 1977 Volvo bus has been provided by Hermit Park Bus Service as part of their trial of 100% biodiesel.

The bus has been fuelled with pure 100% biodiesel.

General Manager of the Hermit Park Bus Service Lyle Fenwick is a keen supporter of the biodiesel and says, "We support anything that is good for the health of our kids".

The biodiesel bus tour is part of the official launch events of **reeFUEL biodiesel**, a new fuel distribution service for biodiesel established in Townsville.

"reeFUEL biodiesel is a natural replacement for petroleum diesel and can drastically improve air quality", says reeFUEL Marketing Manager, Guy Lane.

According to the New Scientist Magazine, petroleum diesel exhaust contains some of the most toxic chemicals known to science.

"We particularly want to remove petro-diesel from school buses, to protect our kids' health and the air quality of Townsville", says Guy Lane.

=====

Full details about the launch events are available on the reeFUEL website **[www.reefuel.com](http://www.reefuel.com)**

Bus Departs TSHS at 0900h Thursday 30 March and returns 1000h.

Journalists are invited to meet the bus at the Townsville State High School or the Wind Rotor on the Strand. Please contact Guy Lane 0410 450 351 or email [sales@reefuel.com](mailto:sales@reefuel.com)
